Summary

Human with **strong experience in managing complex industrial and digital products across global markets (APAC & MEA), with ownership of ₹320+ Cr programs.** Expertise in product strategy, pricing optimization, and end-to-end execution, combining technical understanding with business decision-making. Skilled in leveraging AI and targeted data analysis, along with customer research, product reviews, and user story development, to enhance product positioning, optimize pricing, and improve customer ROI—while maintaining strong first-principles thinking and independent decision-making. Proven ability to translate ambiguous requirements into structured product roadmaps, scalable solutions, and commercially viable offerings. Experienced in product management, cross-functional collaboration, and applying AI tools to improve execution efficiency, competitive benchmarking, and product clarity. Known for ownership, structured problem-solving, and high-impact communication in global environments.

Experience

SMS Group India

Engineer- Technical Sales and Project Management

Gurugram, Haryana

Jan 2024 - Present

- Owned the end-to-end product lifecycle for steel slab caster solutions across APAC & MEA, managing product strategy, technical configuration, and pricing for programs **valued at ₹320+ Cr**, ensuring commercially optimized and technically robust outcomes.
- Conducted detailed evaluation of customer enquiries and re-engineered product configurations to eliminate non-essential components, **achieving ~25% cost optimization** while maintaining required performance standards.
- Developed and applied production and costing models to identify optimization levers, enabling customized product offerings that reduced final pricing by ~15% without compromising technical integrity.**
- Leveraged AI-assisted benchmarking and structured analysis of historical and competitor data to strengthen pricing decisions and improve bid competitiveness, applying data as a support mechanism rather than sole driver.
- Defined optimal product configurations to deliver maximum technological advantage and customer ROI, balancing performance, cost efficiency, and execution feasibility.
- Translated complex business and technical requirements into structured product strategies, roadmaps, and execution frameworks, improving clarity and alignment across stakeholders.
- Drove strategic improvements in product design and execution workflows, influencing stakeholders to adopt changes that reduced delivery timelines and enhanced operational efficiency.
- Collaborated with cross-functional global teams (engineering, sales, and execution) to deliver scalable, high-performance industrial solutions aligned with project and customer objectives.**
- Established KPI tracking frameworks and execution dashboards, incorporating AI-enabled tools to enhance decision-making speed, execution visibility, and cross-functional coordination.

Defence Electronics and Application Laboratory- DRDO

Intern Thermal Design Engineering

Dehradun, Uttarakhand

Jun 2023 - Jul 2023

- Performed research and development for thermal heat management system and simulation using ANSYS ICEPACK, optimizing heat dissipation, system reliability, and energy-efficient product performance.
- Conducted thermal analysis, airflow optimization, and heat load validation to support scalable and sustainable product architectures.
- Acted as Product Analyst by translating technical performance data into actionable insights supporting product development and execution readiness.
- Collaborated with R&D and technical teams, leveraging SQL, Power BI, structured data systems, and technical tools to improve product visibility and engineering decision-making.

Products

Johwa One:

- Built and managed an AI-enabled operations platform focused on intelligent workflows and business process management.
- **Owned complete product lifecycle including: Product discovery, Feature definition, Pricing strategy, PRDs.**
- Developed modules such as: Dashboards, Workflow automation, CRM, Billing, Inventory system.
- Leveraged Excel for structured insights and reporting, supporting decision-making without over-engineering data dependency.
- Delivered a product that improved operational visibility, execution control, and decision efficiency through a mix of AI assistance and strong product judgment.

 **IOT Solar Power Monitoring System:** Led Product Development and Product Management of IoT-based solar monitoring platform supporting renewable energy optimization and ESG goals. Conducted research, defined product architecture, and developed innovative solutions enabling real-time renewable asset monitoring and performance optimization. Provided pricing inputs, product positioning, and execution strategy supporting **₹50 Cr** renewable energy deployment opportunity. Worked with technical teams using Agile methods, structured data management, SQL, and AI tools to enable scalable, data-driven product decisions.

E-Commerce Platform - AI-Enabled Digital Commerce:

- Owned end-to-end Product Management of an ecommerce platform including product strategy, pricing, subscription model design, and **user story definition** aligned with customer journeys.
- Conducted **customer research and product reviews** to identify user needs, pain points, and feature opportunities, translating insights into actionable product requirements.
- Designed AI-assisted features for customer engagement and workflow automation to improve conversion and retention.
- Used data analysis and SQL-based insights to: Track user behaviour, Optimize pricing and subscription tiers, Support product decisions with evidence (not dependency)
- Built scalable product features including payments, subscriptions, and customer dashboards with a focus on usability and monetization.
- Balanced **customer insights, product reviews, and analytical inputs** to drive product growth and lifecycle improvements.

Skills

 **Technical Skills:** Product Costing, CPQ LEEGOO Builder, CRM, SAP, FIGMA, Google Analytics, Internet of Things, AI Tools and Agents, Product design and Modelling, JIRA, Microsoft 365, Microsoft Power Bi, SQL, Web Development, System analysis

 **Soft Skills:** Stakeholder Management, Cross Functional Management, Critical Thinking, Design Thinking, Problem Solving, Planning and Execution, Communication, Leadership and Influence, Time Management, Marketing strategist.

Education

 University Of Petroleum And Energy Studies :- B.Tech - Mechanical Engineering and Minor in International Business CGPA: 8.1 2024 *Dehradun, Uttarakhand*

Certifications

-  Product Management by Great Learning
-  Pricing for Business by Great Learning

Personal Detail

-  Date of Birth: 30th November 2002
-  Languages Know: English, Hindi
-  Location: Gurugram, Haryana
